Thank you

At Shanghai Beaux-arts, Be quality of everything.

Part of the many things that painters can control is the canvas that they work on. Here No-brand canvas provide the canvas roll with three kind of materials: cotton, linen and polyster. More details are showed below.

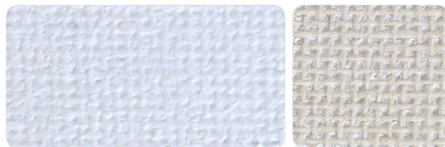

*If there is no special requirements the canvas coating will be 'oil+acrylic'. Any needs with 'watercolor' please mention about it, we can provide it as well.

Premium Cotton Series

About Premium Cotton Series

“ As its name suggests, Premium Cotton Series is meant for those who want every detail to be taken care of when it comes to canvasses quality. The acid-free primer allows the surface to be responsive and highly resilient for building artwork and creating images. The backside of the canvasses is adeptly stretched with self-adjustment mechanism to be flexible without undoing any finished work or compromising the texture. The stretcher bars are made of superb spruce to provide robust canvas mounting which ensures excellent tension at the optimal level for artists' every brush stroke. Weighing 7oz, Premium cotton series is made to take a great deal of “heavyweight” painting with no cracking and sagging that is very common in other less premium series.

Item No.:NB5407

Weight: 7OZ(350-400g)

Canvas Material: Triple primed cotton

Coating: Acid Free acrylic priming

GALLERY Cotton Series

By Shanghai Beaux-Arts

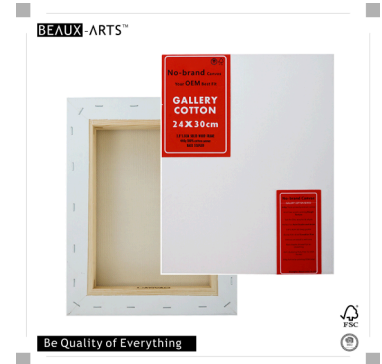

About Gallery Cotton Series

“ 10oz and 440g Gallery Cotton series excels at offering absorptive balance for enhanced paint bonding, so that the oil color will not diminish overtime. They are staple free on the edges giving a very professional appearance and premium perception. Made of 1.5*1.5"(3.8*3.8cm) Kiln-dried Canadian pinewood along with artistically-looking beveled stretcher bar or hand-stretched styling, they possess the right extent of firmness , hardness all combined in an appealing style. Staple free canvasses are the ones stretched carefully on the back of the surface employing the spline method to hide staple marks.

Item No.: NB5410

Pack: 1PC/Shrink

Label: 250g Full color printing OEM label

About Transparent Primed Linen Series

“ The craft of making 290g transparent primed linen has been advanced markedly thanks to the better selection of linen raw materials. This type of linen is manufactured from a robust thread producing a lasting image with special artistic impression of natural color. It is clear acrylic primed and will absorb well caseins, acrylic colors, oil colors, egg tempera or alkyds. In addition, it serves as a good substitute for sanded pastel paper due to its higher perceived canvas texture value.

Item No.: NB7318

Weight: 290g

Canvas Material: transparent primed premium linen

Coating: Acid Free oil priming

Texture: Medium Texture

Media: Suit for Acrylic, oil, tempera, caseins, alkyds

Users: Perfect for Pro Artist

>> Stretcher Bar & Frame

STRETCHER Bar & Frame

... By Shanghai Beaux-Arts

No-brand Strecher Bar made out of first quality kiln dried Sweden spruce, Canadian pine. Each strip is smooth sanded and finished, slotted with rounded inside corners and has a uniform beaded edge for forming a perfect painting support.
The length we can provide is 20cm, 25cm, 30cm... 150cm.

Material Specification

All the stretcher bar and frame materials we choose are made of first quality kiln dried Sweden spruce and Canadian pine two kind of wood material only.
The difference between Canada Pine and Sweden Spruce are:

a). Different density.

Canada Pine's density is more higher.

Figure 1: Canada Pine Figure 2: Sweden Spruce

b). Scab.

Sweden Spruce has scab but Canada Pine is smooth and clean.

Figure 3: Sweden Spruce has scab

Details

a). Precision cut and polish

Precision cut they are smoothly sanded and finished and feature a uniform beaded edge so canvas is slightly offset to provide a good painting feel.

Figure 4: Polishing in Factory

b). About Tenoning

These strips offer the traditional slotted and rounded corners that offer simple assembly by interlocking two strips to form a corner. (Figure 5)

Figure 5: Tenoning

c). Double Thick Gallery Stripe

These double thick tongue and groove stretcher strips provide a beefy weight for a sturdier frame than standard duty strips. Square strips measure 3.8cm high and 3.8cm wide and have a full contoured edge so taught canvases have a perfect "give" when painting. (Figure 6)

● Oval 1.8cm Back stapled		
Size	Pcs/Ctn	Packaging size (cm)
20X30cm	40	42X32X40
30X40cm	20	42X40X32
40X50cm	20	52X40X42
50X60cm	20	62X40X52
60X80cm	10	82X21X62

??>> How many years have you been in Business?

Shanghai Beaux Arts Material Ltd was incorporated in 2008 by founder Stefan Lu. The company has both manufacturing capacity and sales force exclusively engaged in art materials export globally.

??>> How many office employees does Beaux Arts employ?

Shanghai Beaux Arts has more than 10 full-time sales staff members operating both in Shanghai China and our North America office in Canada. China operation overseas product design & sampling, bid & quote, R&D, QC, logistics, sourcing and customer services etc, the North American team handles US & Canada domestic sales and marketing as well as post-sales customer services.

??>> Do you charge for sampling and its associated freight?

To ensure that customers have the right “touch and feel” of the final product in a timely manner, Sampling is free and usually takes no more than two weeks for them to reach 95% of our overseas customers. As a token to support their business, We do not charge sampling freight to our repeat customers either. However, for first time buyers, a nominal freight will be charged at a reasonable rate.

??>> What is your payment term?

30% down payment before production, 60 % against Bill of lading, 10% after mutually agreed customer inspection acceptance outcome.

??>> What is your MOQ?

This could vary depending on product type, product complexity, and raw material availability and how strategic a customer is scored to our road-map. To give an example, in the case of 16*20" economy canvasses series, to deliver optimal costing advantages for committed buyers, a benchmark MOQ could be 3,000 pieces for a FOB value no less than 5,000 USD.

??>> Does your company own your own manufacturing facility?

We do have partial equity ownership in key subsidiary factories producing our flagship strategic products such as paint brushes etc. To maintain quality assurance continuity, we have also forged exclusive supply partnership with tier-one factories in China and Southeast Asia. We only work with a number of factories that are both quality and cost leaders in their specific product category to supplement our in-house products. Before a factory is approved to work with us, they must go through a very stringent Shanghai Beaux-Arts screening process and audit. We consider our relationships with our partners very strong and reciprocal.

??>> For those products not made by you, why should I work with you and not buy directly from factory?

Customer can go factory-direct and get quoted on very low price, however there are a great deal of risk and hidden costs in sourcing this way. Most of our customers find it is usually a lot more cost-effective to benefit from Beaux-Arts existing manufacturing channels to have full end-to-end control from quality assurance to timely delivery. Our long time product know-how, packaging, shipping, customs clearance etc is in place to ensure you a peace of mind by our one-stop-shop services.
